Brian Ramoroka

Front-end Developer

Cape Town, Western Cape | +27 81 379 8635 | ramorokaob@gmail.com | linkedin.com/in/brian-obr | github.com/Brian-obr | brianramoroka.co.za

Based in Cape Town. Open to roles in Midrand, Johannesburg, Pretoria and remote. Full-time. Notice period: 1 month.

PROFILE

Front-end developer in Cape Town. I work as an SEO Web Developer at Rhiza Babuyile, where I build and fix client websites in WordPress, WooCommerce and Shopify, and check every page for speed, search and accessibility before it goes live. I studied Java at CPUT and used it with Spring Boot during my internship at BIIC. I'm looking for a full-time front-end role where I write more code and work on the same product over time.

SKILLS

Front-end: HTML5, CSS3, JavaScript (ES6+), TypeScript, React, Next.js (App Router), Angular, SvelteKit, Tailwind CSS, Shopify Liquid, responsive and mobile-first design, web accessibility (WCAG)

CMS and e-commerce: WordPress (Gutenberg, Elementor, Divi, Bricks Builder, WPBakery, Beaver Builder, Avada and other builders), WooCommerce, Shopify, Magento 2, PrestaShop, OpenCart, Lightspeed eCom, Odoo, Joomla, Drupal, Wix, Webflow

SEO and performance: Technical SEO, Core Web Vitals, structured data (JSON-LD), XML sitemaps, Google Search Console, GA4, Google Tag Manager, Microsoft Clarity, Rank Math, Yoast SEO, Screaming Frog, Ahrefs, Semrush, WP Rocket

Back-end and languages: Java, Spring Boot, PHP, Node.js, Python, C#, .NET, Hibernate, Maven, object-oriented programming, design patterns, microservices

Databases: PostgreSQL, MySQL, Supabase, SQLite

APIs and testing: REST APIs, OAuth, Zapier, unit testing, JUnit, Mockito, Test-Driven Development (TDD)

Cloud and DevOps: Azure, AWS, Git, Docker, CI/CD, Linux, Vercel, Pantheon

Ways of working and tools: Agile / Scrum, Jira, IntelliJ IDEA, Figma, Canva, Salesforce Lightning, AI tools (Claude, ChatGPT, GitHub Copilot, Cursor)

Basic exposure: C++, RabbitMQ, Matlab

EXPERIENCE

SEO Web Developer, Rhiza Babuyile

Cape Town, Western Cape | Full-time, on-site | 03/2025 - Present

Rhiza Babuyile is a South African company that partners with Grizzly New Marketing in the Netherlands. I work with their team on client websites for businesses mainly in the Netherlands and Belgium, and also in Germany, France, Spain, the UK and the US, as well as .com sites.

Website development

- Develop and maintain SEO-optimised client websites, mostly in WordPress (Elementor, Divi, Bricks Builder, Gutenberg, WPBakery and other builders) and WooCommerce
- Fix and improve front-ends in HTML, CSS and JavaScript
- Make sites responsive, mobile-friendly and quick to load, including with WP Rocket
- Check pages for accessibility against WCAG, including alt text and colour contrast
- Build location and service landing pages for lead generation campaigns
- Customise Shopify themes in Liquid, CSS and JavaScript, and update products, pages and meta data

Technical SEO and tracking

- Run technical SEO audits covering crawlability, indexing, site speed and Core Web Vitals, then fix the issues found
- Add JSON-LD structured data (schema markup), in the CMS or through Google Tag Manager
- Set up Google Search Console, GA4, Google Tag Manager and Microsoft Clarity, submit XML sitemaps and request indexing
- Make on-page changes (meta titles and descriptions, alt text, internal links, CTAs) and do link building
- Use Screaming Frog, Ahrefs, Semrush, AWR, Rank Math and Yoast SEO for audits and tracking

Other platforms and tasks

- Work on Magento 2, PrestaShop, OpenCart, Lightspeed eCom, Odoo, Webflow, Wix, Joomla, Drupal, Weebly, JouwWeb and custom CMSs when a client site runs on them
- Fix forms in Contact Form 7 and Gravity Forms and set up Google reCAPTCHA
- Advise technical owners and content writers, and track tasks in Salesforce Lightning
- Use AI tools for research, drafting, and writing, reviewing and debugging code, and check what they produce

Software Developer Intern, Business Innovation & Incubation Centre (BIIC)
Cape Town, Western Cape | Internship, hybrid | 07/2024 - 12/2024

- Worked across the full development lifecycle of Java and Spring Boot applications backed by PostgreSQL, in an Agile team
- Built features, fixed bugs and improved existing functionality
- Worked with REST APIs and used OAuth to secure applications
- Used Azure cloud services, Git for version control, and Zapier
- Helped with database management and back-end development

PROJECTS

The Breezy Exchange (in progress)
A WooCommerce sneaker store I'm building as a demo of a South African resale shop. Shoppers pick a UK size and a condition grade and go straight to the matching pairs, each grade priced in rand, VAT included. Built with WordPress, WooCommerce, Elementor, Blocksy, ShopEngine, Rank Math and PHP, hosted on Pantheon.

brianramoroka.co.za
My own website, designed and built with the Next.js App Router, React, TypeScript and Tailwind CSS, and hosted on Vercel, with page metadata, Open Graph tags and JSON-LD structured data. Code on GitHub: github.com/Brian-obr/Brian-Ramoroka-Portfolio.

EDUCATION

Advanced Diploma in ICT: Application Development (NQF level 7), Cape Peninsula University of Technology (CPUT), 2025

Diploma in ICT: Application Development, Cape Peninsula University of Technology (CPUT), 2021 - 2024
